BI Cards

Provides easy-to-use KPI and other indicator widgets to be used in visualization dashboards

Overview

BI Cards have a flexible infrastructure that allow the definition and visualization of KPIs, as well as other data.

BI Cards are available as widgets that can be used in a Dashboard.

Figure 1 BI Cards example

Key Features

- Create and define KPIs with different dimensions (e.g.: Current Day, Last Seven Days)
- Collect data from different data sources and apply business rules for complex data calculations
- Present information using a set of visually rich widgets

Benefits

- Increased visibility and monitoring
